

The fontawesome6 package*

Font Awesome[†](The font) Daniel Nagel[‡](The L^AT_EX package)

April 21, 2025

This package provides L^AT_EX support for the Font Awesome 6 icons.

Thanks goes to Marcel Krüger for the original fontawesome5 package, which was the basis for this package.

To use Font Awesome 6 icons in your document, include the package with

```
\usepackage{fontawesome6}
```

Alternatively you can add the `fixed` option to get fixed-width icons:

```
\usepackage[fixed]{fontawesome6}
```

For every icon a macro is provided: Just use the official icon names converted to CamelCase with the prefix `\fa`. For example to use the `hand-point-up` icon, use `\faHandPointUp`. An optional argument can be added to select the style (`solid` or `regular`). The default style is `solid`, it can be changed with `\faStyle{...}`

Every icon can also be accessed using the official icon name. To do this, you can use `\faIcon{the-icon-name}` or `\faIcon[style]{the-icon-name}`.

A list of all included icons with their respective commands can be found at the end of this document.

Example

```
...
\usepackage{fontawesome6}
...
\begin{document}
...
A simple icon: \faHandPointUp\\
Multiple versions of the file icon:
\faFile~
```

*This document corresponds to fontawesome6 version 6.7.2, dated 2025/04/20

[†]More information at <https://fontawesome.com>

[‡]Github: github.com/braniiii

```

\faFile[solid]~
\faFile[regular]~.\
Alternative syntax:
\faIcon{file}~
\faIcon[solid]{file}~
\faIcon[regular]{file}~.
...
\end{document}

```

A simple icon: 🖱️

Multiple versions of the file icon: 📁 📁 📁 .

Alternative syntax: 📁 📁 📁 .

Font Awesome Pro

Font Awesome 6 is available in a Free and a Pro version. This package uses the free version by default. If you own a Pro license and have the Font Awesome 6 Pro desktop fonts installed in your system font path, you can use Pro instead. For this, load the package with the `[pro]` option:

```
\usepackage[pro]{fontawesome6}
```

Now additional icons, the `duotone` and the `light` style can be used. The second color for `duotone` icons can be set through `\faDuotoneSetSecondary`:

```
\faDuotoneSetSecondary{green}% From here on, the secondary layer
                             % will be green.
```

Pro is only supported with \XeTeX and \LuaTeX . For icons ending with `-alt`, append a `*` instead.

Updates

This package corresponds to Font Awesome 6.7.2. In case there is a newer version available on the Font Awesome homepage, check for updates on <https://ctan.org/pkg/fontawesome6>. Should there be no corresponding update on CTAN, you can write a mail to tex@2krueger.de. If you use \XeTeX or \LuaTeX , you can also directly download the new Desktop Fonts from <https://fontawesome.com> into your \TeX tree.

If you save them with the filenames

```
FontAwesome6Brands-Regular-400.otf
```

```
FontAwesome6Free-Regular-400.otf
```

```
FontAwesome6Free-Solid-900.otf
```

the package will start using the new version right away.

Bugs

For bug reports and feature requests, open an issue at github.com/braniiii/fontawesome6.
