The fontawesome6 package*

Font Awesome†(The font)   Daniel Nagel‡(The LaTeX package)

April 20, 2025

This package provides LaTeX support for the Font Awesome 6 icons.

Thanks goes to Marcel Krüger for the original fontawesome5 package, which was the basis for this package.

To use Font Awesome 6 icons in your document, include the package with

```
\usepackage{fontawesome6}
```

Alternatively you can add the `fixed` option to get fixed-width icons:

```
\usepackage[fixed]{fontawesome6}
```

For every icon a macro is provided: Just use the official icon names converted to CamelCase with the prefix `\fa`. For example to use the `hand-point-up` icon, use `\faHandPointUp`. An optional argument can be added to select the style (`solid` or `regular`). The default style is `solid`, it can be changed with `\faStyle{...}`

Every icon can also be accessed using the official icon name. To do this, you can use `\faIcon{the-icon-name}` or `\faIcon[style]{the-icon-name}`.

A list of all included icons with their respective commands can be found at the end of this document.

Example

```
...
\usepackage{fontawesome6}
...
\begin{document}
...
A simple icon: \faHandPointUp\\
Multiple versions of the file icon:
  \faFile~
```

1

```
  \faFile[solid]~
  \faFile[regular]~.\\
Alternative syntax:
  \faIcon{file}~
  \faIcon[solid]{file}~
  \faIcon[regular]{file}~.
...
\end{document}
```

A simple icon: ✌

Multiple versions of the file icon: ▮ ▮ ▯ .

Alternative syntax: ▮ ▮ ▯ .

Font Awesome Pro

Font Awesome 6 is available in a Free and a Pro version. This package uses the free version by default. If you own a Pro license and have the Font Awesome 6 Pro desktop fonts installed in your system font path, you can use Pro instead. For this, load the package with the [pro] option:

```
  \usepackage[pro]{fontawesome6}
```

Now additional icons, the duotone and the light style can be used. The second color for duotone icons can be set though \faDuotoneSetSecondary:

```
  \faDuotoneSetSecondary{green}% From here on, the secondary layer
                               % will be green.
```

Pro is only supported with X∃LATEX and LuaLATEX. For icons ending with -alt, append a * instead.

Updates

This package corresponds to Font Awesome 6.7.2. In case there is a newer version available on the Font Awesome homepage, check for updates on https://ctan.org/pkg/fontawesome6. Should there be no corresponding update on CTAN, you can write a mail to tex@2krueger.de. If you use X∃LATEX or LuaLATEX, you can also directly download the new Desktop Fonts from https://fontawesome.com into your TEX tree. If you save them with the filenames
```
 FontAwesome6Brands-Regular-400.otf
 FontAwesome6Free-Regular-400.otf
 FontAwesome6Free-Solid-900.otf
```
the package will start using the new version right away.

Bugs

For bug reports and feature requests, open an issue at github.com/braniii/fontawesome6.

Full icon list for FontAwesome 6 Free

All icons marked with ™ are brand icons.

> All brand icons are trademarks of their respective owners. The use of these trademarks does not indicate endorsement of the trademark holder by Font Awesome, nor vice versa. *Please do not use brand logos for any purpose except to represent the company, product, or service to which they refer.*
